

## Shopify – Setting Up Shipping Rates and Methods

**Note:** We're testing a discussion feature on this page. Scroll to the bottom to try it!

After you've [set up shipping zones](#) for the destinations where you want to ship your products, you can think about the methods you'll use to get your customers' orders to them. You can offer several shipping options for a zone so your customers can choose from a range of delivery speeds and costs:

- Create price-based or weight-based shipping rates for [regular postage services](#).
- If your store's on the Advanced Shopify plan or higher, you can offer [real-time shipping rates from USPS, FedEx, UPS, and other carriers](#).
- Choose from available fulfillment and dropshipping services that will [ship your orders for you](#).

You configure all your store's shipping options from the **Shipping** settings page. These settings generate shipping options that are offered to your customers at checkout, depending on their location and the details of their order.

### Did you know?

Want to use Shopify Shipping for your next fulfillment? You can [buy a shipping label for your most recent order](#) in your Shopify admin (US-based stores only).

### In this section

- [Manual rates for regular mail services](#)
- [Carrier-calculated shipping](#)
- [Suspending or deleting rates](#)
- [Using fulfillment services](#)
